ABSTRACT

Proposed Lawak Elementary School Information System will eliminate all the manual intervention and increase the speed of whole process. System will allow the user to fill in the form in the system. After successful submission, system will generate the data and each student enrolled will receive a unique student number. Teacher can register in system and after approval of admin, teacher can log in into the system and add result details. System will store the results for mark-sheet and certificate generations. The objective of the Lawak Elementary School Information System is to allow the administrator of the school to keep records of the student. Store report, mar-sheet and certificate automatically generated based on the stored data.
