A research study presented to the Faculty of the College of Communication and Information Technology in partial fulfillment of the requirement for the Degree: Bachelor of Science in Computer Science (BSCS) entitled:

**E- PLACEMENT AND CAREER DEVELOPMENT SERVICES OF THE  
 RAMON MAGSAYSAY TECHNOLOGICAL UNIVERSITY**

Has been prepared and submitted by Daniel A. Bachillar, Emmanuel M. Pepito and Joy B. Echipare who are hereby recommended for oral Examination.

  
**PROF. MENCHIE DELA CRUZ**

Adviser

Approved by the Committee of Oral Examiners:

  
**DAIMEL D. DELOS REYES**

Member

  
**CARLO C. AYRAN**

Member

  
**ENGR. RICKY BARRERA**

Member

  
**GEOFFREY A. SEPILLO**

Member

Accepted as requirement for the degree of  
**BACHELOR OF SCIENCE IN COMPUTER SCIENCE.**

  
**ENGR. FRANCO D. NERO**

Dean, CCIT

## ABSTRACT

This study aimed to determine the level of efficiency of the current system of the placement services and the proposed e-placement and career development services system of the Ramon Magsaysay Technological University and correlate with the selected profile of the variable.

The descriptive method of research was used in the study with the questionnaire as main instrument in gathering data. The respondents include twenty (20) alumni, twenty (20) students and ten (10) OSA personnel for a total of fifty (50). The researcher used convenience sampling and the statistical tools were Frequency and Percentage Distribution, Weighted Mean, ANOVA, Correlation Analysis and t-test.

Based on findings of the study comparing the effectiveness of the current and the proposed e-Placement and Career Development Services, the researchers found out that the proposed system is Much Efficient in terms of the System Quality Metrics compared to the current system being used by the university. Therefore, the researchers concluded that the proposed e-Placement and Career Development Services should be implemented on the Ramon Magsaysay Technological University.

The provision of a faster internet connections and services of the computers is much indeed for more reliable system. It is further recommended to the administrator to encourage the users on system familiarization through continuous computer literacy education. Conduct a similar study on e-Placement and Career Development Services which is deeper and wider in scope.
