### ABSTRACT

The focus of this study was to develop and implement a web-based restaurant ordering system that can be used to revolutionize the traditional ordering system. It would help the costumers order food in a fast, efficient and convenient way. On the other hand, the proposed system will lessen owners' burdens especially in marketing department and increase business productivity. This can improve their business transaction methods. This study would be very significant to the customers, restaurants, Department of Trade and Industry, Bureau of Internal Revenue, competitors, researchers and future researchers.

This study employs the descriptive methods of research. The respondents are the customers and employees of U&I Cuisine Restaurant located in Iba, Zambales. To gather data, questionnaires distributed to the respondents. The data analyze and interpreted using frequency and distribution and weighted arithmetic mean.

On the basis of findings of the study, the level of assessment of the respondents is excellent, the level of acceptability is highly acceptable, and the degree of recommendation is highly recommended. In the light of the findings and conclusions, Restogo: Ibanian's Online Cuisine and Menu is an excellent online food ordering system. If customers have a problem in food ordering, this innovation is finally the answer.
