COLLEGE OF COMMUNICATION AND INFORMATION TECHNOLOGY

ACKNOWLEDGEMENTS

CERTIFICATION

This thesis entitled "**RAMON MAGSAYSAY TECHNOLOGICAL UNIVERSITY ONLINE STUDENT PORTAL**" prepared and submitted by **Michael Roi H. Cacho, Jan Amil M. Peruelo and Mark Kyle M. Quilala** in partial fulfilment of the requirements for the degree of **Bachelor of Science in Information Technology**, has been examined and recommended for Oral Examination.

JOHN RODEL A. PINO
Adviser

APPROVAL SHEET

Approved by the PANEL OF EXAMINERS on Oral Examination on March 14, 2018 with the grade of _____.

NEMIA M. GALANG, Ph. D.
Chairman

WALTER G. LARA
Member

DARWIN M. MORANA
Member

Accepted in Partial fulfilment of the requirements for the degree
Bachelor of Science in Information Technology.

ABSTRACT

The study was conducted to develop Ramon Magsaysay Technological University Online Student Portal that function to the faculty members of online giving grades to student, updating news and announcements and forum that can communicate student and faculty members. This system has made the process of giving grades to student easier, less costly and more effective.

The study aimed to determine the perception of respondents on the level of effectiveness of the proposed Ramon Magsaysay Technological University Online Student Portal in terms of functional suitability, performance efficiency, compatibility, usability, reliability, security, maintainability and portability. It also aimed to determine the respondents' perception on the degree by which they will recommend the acquisition and implementation of the proposed system when grouped according to profile variables.

The descriptive research design was used in the conduct of the study through the use of questionnaires as the main instrument to gather data. The study was conducted among one hundred eighty (180) respondents of Ramon Magsaysay Technological University. The respondents were composed of university faculty members and students.

It has revealed that the typical respondents were students under the age class of 21-25 years old. The study also shows that the respondents' perception on the level of effectiveness of the proposed system in terms of functional

COLLEGE OF COMMUNICATION AND INFORMATION TECHNOLOGY

suitability of students which is 4.59 as Very Effective and for the faculty which is 4.70 as Very Effective; performance efficiency of students which is 4.53 as Very Effective and for the faculty which is 4.47 as Very Effective; compatibility of students which is 4.59 as Very Effective and for the faculty which is 4.62 as Very Effective; usability for students which is 4.52 as Very Effective and for the faculty which is 4.63 as Very Effective; reliability of students which is 4.45 as Very Effective and for the faculty which is 4.48; security of students which is 4.59 as Very Effective and for the faculty which is 4.57 as Very Effective; maintainability of students which is 4.40 as Very Effective and for the faculty which is 4.55 as Very Effective; and portability of students which is 4.49 as Very Effective and for the faculty which is 4.58 as Very Effective. Generally, the overall perception on the level of effectiveness is 4.55 as Very Effective. The respondents' perception on the degree by which they will recommend the acquisition and implementation of the system as Highly Recommended (HR) with a grand mean of 4.48. Moreover, the implementation of Ramon Magsaysay Technological University Online Student Portal can provide 27.11 percent of saving, equivalent to Php 67,512 in its first year of implementation.

The researchers strongly recommends maintenance and continuous development of the system should done to help it adapt to constantly changing trend of the Ramon Magsaysay Technological University, researchers recommended adding other features to the Student Portal like Account Balance monitoring and E-Library and other related features that would benefits every

students and faculty members of Ramon Magsaysay Technological University and conducts further study after the initial implementation of the Ramon Magsaysay Technological University Online Student Portal.

Background of the study, theoretical framework, conceptual framework, statement of the problem, hypothesis, research questions, significance of the study and the definition of terms used.

Introduction

The development of technologies is rapidly rising, the quest for more comfortable way of life are now within reach. But what comes to people mind when they hear of the word technology? "Technology is the use of scientific knowledge for practical purposes or applications, whether in industry or in our everyday lives. So basically, whenever we use our scientific knowledge to achieve some specific purpose, we are using technology" (Wood, 2010). Technology has brought many changes in today's society. It gives people much speed to surface a work, it reduces human error due to higher efforts in need that a single human cannot do. In business, technology helps increase productivity and less manpower. People interact, socialize, and process information in entirely different ways and it spread to all areas of life including medicine, agriculture, transportation, communication and education.

Technology indeed plays a vital role in improving the educational system. Technology and education are a great combination if used together with a right reason and vision." (Saxena, 2013). Now, available computer technology offers
