ABSTRACT

Title of the Thesis:

**INFORMATION SYSTEM FOR BARANGAY
TAUGTOG**

Name of Researchers:

Robert Allan M. Paneda

Jonalyn D. Dequiña

John Paul P. Albay

Degree:

Bachelor of Science in Computer Science

Date of Oral Defense:

March 13, 2011

Name of Adviser:

Mrs. Menchie A. Dela Cruz

Name of College:

**College of Communication and Information
Technology**

Name of School:

**Ramon Magsaysay Technological University
Iba, Zambales**

This study aimed to determine the level of efficiency of the Existing and the Proposed Information System for Barangay Taugtog and correlate with the selected profile and variables.

Descriptive method of research was used in the study with the questionnaire as main instrument in gathering data. Informal or unstructured interviews and observations were also resolved to validate findings.

There are 30 respondents from the Barangay Taugtog , 9 barangay officials and 21 residents. The statistical tools were frequency and percentage distribution, mean and t-test of variance.

There is no significant difference between the Level of Efficiency of the Manual Process to the Proposed Information System when grouped according to the variables Accuracy, Security, Speed of Processing and Ease of Procedures.

The study recommends the implementation of the system to the Barangay Taugtog for a more accurate, secured, and speedy transaction on the record storage and identification, advocate the users of the system specially the personnel on security of the records on familiarization of the system through continuous computer literacy education.
